TIPS FOR PRINTING & USE:

If possible, print on card stock and laminate or cover with clear contact paper for durability.

Ideas for use:

1. Print the first page back-to-back with each of the following pages. Laminate the cards if desired, then punch a hole where each black circle is found under numbers on card fronts.
2. Hold up one card at a time within reaching distance of one child at a time. Have them add the number of cats on the card, then poke the tip of their finger into the hole under the correct answer, turning the card over to check their answer: stars for correct, x's for incorrect (“try again”).
3. Cards can also be given to children as a self-checking activity for alone time.
